

Muhammed Ijlan TK

ESG Consultant | Carbon Compliance (CCTS • PAT • RCO • VCM) | GHG & Carbon Accounting | Environmental Science

ijlanibrahim@gmail.com | +91 6235169777 | [linkedin.com/in/ijlan-tk](https://www.linkedin.com/in/ijlan-tk) | Portfolio: <https://muhammed-ijlantk-tech.github.io/ijlan-esg-portfolio/>

| Open to relocation

PROFESSIONAL SUMMARY

ESG Consultant with an MSc in Environmental Science and hands-on experience in carbon compliance data analysis, including renewable energy consumption obligation (RCO) tracking, electricity bill analysis, and Excel-based compliance dashboards. Building working knowledge of India's evolving carbon regulatory landscape (CCTS, PAT), voluntary carbon markets (VCM), and GHG Protocol-based carbon accounting through active professional development. Combines this compliance experience with a research background in ESG materiality assessment and GIS-based environmental field research. Seeking to grow into a dedicated ESG / Sustainability / Carbon Analyst role.

PROFESSIONAL EXPERIENCE

ESG Consultant — Carbon Crunch

Sep 2026 – Present

- Collected and analyzed renewable energy consumption data to calculate compliance gaps against Renewable Consumption Obligation (RCO) targets; tracked and reported client progress toward regulatory obligations.
- Processed and analyzed electricity bills to extract energy consumption data, feeding it into RCO compliance calculations.
- Built and maintained Excel-based RCO obligation-tracking spreadsheets and compliance calculators to support client-facing reporting.
- Cleaned and structured raw energy/consumption data from multiple sources to improve accuracy and consistency of compliance tracking.
- Developing working knowledge of India's carbon regulatory frameworks — Carbon Credit Trading Scheme (CCTS) and Perform, Achieve, Trade (PAT) — and Voluntary Carbon Market (VCM) mechanisms, alongside GHG Protocol-based carbon accounting, to support broader ESG advisory work.

EDUCATION

MSc Environmental Science — Jamia Millia Islamia, New Delhi

Jul 2024 – May 2026

Dissertation: "Noise Pollution Mapping in Thickly Populated Clusters of Delhi Using GIS and Field-Based Noise Monitoring" (Supervisor: Dr. Sirajuddin Ahmed, Dept. of Environmental Sciences)

BSc Environmental Chemistry — Maharaja's College, Kochi, Kerala

2021 – 2024

SKILLS

Carbon Compliance & Regulatory Frameworks: RCO Compliance Tracking & Obligation Analysis, CCTS, PAT, Voluntary Carbon Market (VCM), Carbon Accounting / GHG Protocol, BRSR, BRSR Core, GRI, IFRS Sustainability Disclosure Standards

Data & Analysis: Energy & Electricity Bill Data Analysis, GHG Emissions Data Interpretation, ESG Data Collection & Analysis, Environmental Field Monitoring, CPCB Standards Benchmarking, Spatial & Statistical Analysis

Tools: Excel (compliance trackers, obligation calculators, dashboards, pivot tables), QGIS (spatial mapping & analysis), Power BI (basics)

PROJECTS

Noise Pollution Mapping Using GIS and Field-Based Monitoring — MSc Dissertation

2025 – 2026

- Measured Lmax, Lmin, and Leq noise levels across 36 locations in Delhi across 6 time periods per site — 200+ individual readings capturing day-vs-night and weekday-vs-holiday variation.
- Compiled the dataset in Excel and mapped spatial/temporal noise distribution in QGIS across residential, commercial, and silence zones.
- Benchmarked results against CPCB ambient noise standards to identify non-compliant hotspots; investigated causes (traffic density, land use, zoning gaps).
- Produced comparative noise-contour maps to support evidence-based noise-zoning recommendations.

ESG & Environmental Performance Dashboard — Academic Case Study (Infosys, public disclosure data)

2025

- Analyzed Infosys's publicly disclosed ESG data (FY2023–FY2025) covering GHG emissions, renewable energy usage, water consumption, and waste generation.
- Built an Excel-based ESG dashboard tracking GHG emissions (226,701 tCO2e in FY25, down from FY23), renewable energy share (40.6%), water usage (4.1 Mn m³), and waste generated (37,518 t).
- Derived an overall environmental performance score (84/100) and summarized year-on-year trends.
